

# SECURITY CHEQUES

**INTEGRITY**  
THE PRINT PROFESSIONALS

**Trust the UK leader. Integrity is a specialist manufacturer of cheque stationery. Our innovative approach to high security print has earned us the trust and business of the leading financial institutions.**

Integrity offers a thoroughly dependable and comprehensively protected service for producing cheques with advanced security features, operating from an APACS accredited secure site.

With a comprehensive range of security printing techniques on offer, we can produce cheques that are virtually impossible to forge or copy, supported by a flexible and responsive service.

## PRODUCT FEATURES

### Watermarked CBS1 security paper

Paper only available from a strictly controlled supply, featuring a heavy overall watermark design.

### Solvent ink

The image bleeds when attacked by solvent-based agents.

### Aqua ink

The image bleeds when attacked by water-based agents.

### UV inks

Can be printed across the whole document in an invisible pattern which can only be seen under ultra violet light.

### Thermochromic inks

React to heat changes for instant validation.

### APV ink

A specially formulated ink that is designed for use with security products that require laser infilling. A transparent varnish, with fluorescent properties, is applied to vulnerable areas and increases laser toner adhesion by 30%.

### Numismatic design

Complex fine line relief patterns can be created that are almost impossible to replicate.

### Micro text

A printed feature containing an ultra fine small font that is very difficult to scan or colour copy.

### Hologram

A visible deterrent against counterfeiting using the unique and highly advanced S-security holographic foil. Hologram can have bespoke logo cut out for more visible branding.

### Security numbering

A full range of numbering is available, from standard audit numbers through to MICR line encoding, bleed through, invisible UV and multi-part crash numbering.
